

# MINI PRISM POLE SYSTEM

“European”-style sectional pole that can be assembled in various configurations. Lightweight and very portable. Prisms can be mounted on top, bottom or in between sections. All lengths of components are known so prism height can easily be calculated. Weighs 1.18 lbs. (.53kg.) White site cones improve vertical angle accuracy and double as tilting locks.

Comes with:

- One 25mm Tilting Prism and Holder, with built-in adjustable 40-minute circular vial. Height: 10cm. to tilting axis.
- One 5cm Height Point with replaceable hardened plumb bob tip.
- Four 30cm sections, 1/2" (13mm) diameter, 1/4-20 threads.
- Cordura carrying case.
- 65mm adapter. Makes the height, 115mm and allows mounting to regular 5/8-11 Prism Poles.
